### **NON-GMO Declaration**

Van den Elzen Plantenkwekerij Erp B.V. declares that all varieties that have currently been released for testing or have been admitted to circulation have been developed using traditional improvement methods, without making use of genetic modifications techniques.

If we should in the future accept for testing or bring into circulation varieties that can be regarded as Genetically Modified Organisms (GMOs), we will make this known.

Yours sincerely,

Van den Elzen Plantenkwekerij Erp B.V.
